Team Members: Shoon Zhen Yong, Kua Jia Kang

Project Title: A web portal for online pizza delivering - Connectus

Summary of Project: The objective of this project is to design a web application for online pizza delivery. The web application is a one stop portal for the restaurant. In our homepage, posters and the restaurant's history are displayed. In our web application, users can choose to register and login to our portal for quicker booking process and membership rewards. Our application includes a page showing different food served and their details. Users can customize the food served and add them into their cart. By selecting the cart, users will be directed to our order page to view the full summary of the food added to the cart and the subtotal amount before proceeding to payment. Our application also includes a page for users to redeem vouchers through membership points, unique code and deals offered by the restaurant. Users can check their redeemed vouchers and add them into the order summary before checking out. Few payment methods will be provided for users to choose for user convenience. Once the payment is done successfully, an email notification including the booking details will be sent to the user. Our application also provides users order history checking feature.

Table of Contents

1. Applications Requirements and Specifications	3
2. Functional Requirements and Specifications	4-5
3. Design of the Web Application	
3.1 Sitemap	6
3.2 Storyboard	6-10
3.3 Wireframe	11-16

1.Application Requirements and Specifications

	Requirements	Specifications
R1	Home Page Overview	Users can view posters, best deals and restaurant's introduction in the homepage
R2a	Login	Users can login to the system by filling in his valid email address and password to allow autofill of particulars
R2b	Sign Up	Users can sign up to become our member by filling up account information (email address & password) and personal information (name & contact number)
R3a	My Profile	Signed in users can make changes on their personal information
R3b	My Coupon	Signed in users can view their redeemed coupons
R3c	My Order	Signed in users can view their order history
R3d	Logout	Signed in users can log out anytime
R4a	Menu	Users can view all the available food served (Pizza, Side Order and Beverages) and their description
R4b	Add to Cart	Users can add the available food served to their shopping cart
R4c	View Cart	Users can view their shopping cart and the subtotal amount. User can remove the item from the cart if necessary
R5	Personalize Pizza	Users can choose the size, crust and edit the toppings of the pizza
R6	Add Coupon	Users can add their redeemed coupon to the view cart
R7	Payment	Users can select their preferred payment method

3.2 Storyboard

1
The storyboard is designed based on certain scenarios. The list of scenarios that we had planned is shown as below.

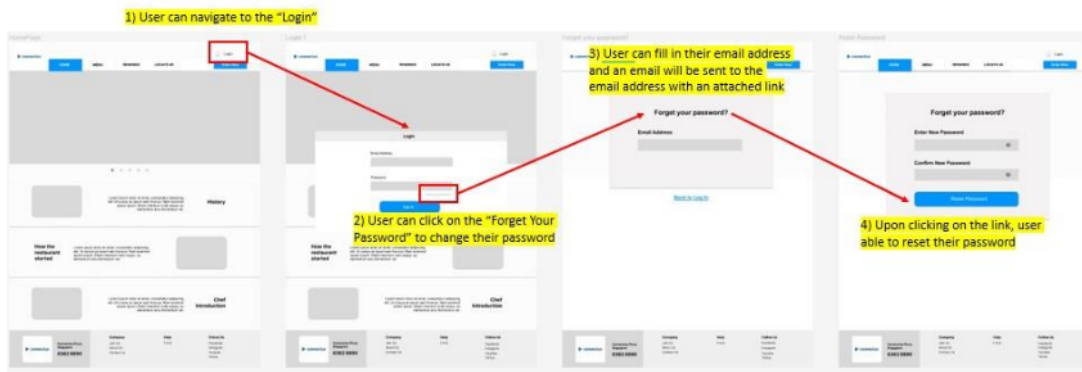

- Users wish to login or sign up for an account
- Users wish to reset their account password
- Users wish to add the items into the cart and checkout
- Users wish to view their reward points, redeem vouchers and view their vouchers
- Users wish to check for our restaurant's branch location, operating hours and outdoor appearance

- Users wish to login or sign up for an account

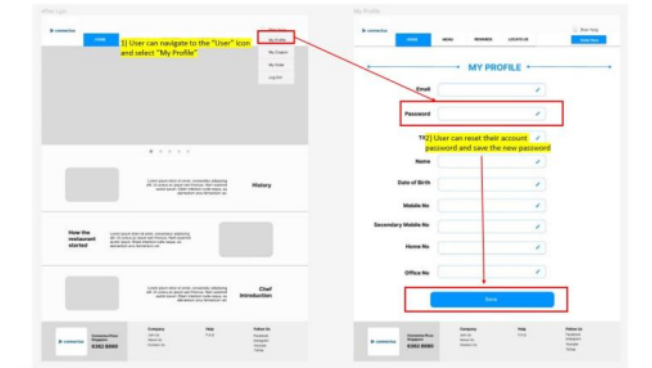

- Users wish to reset their account password

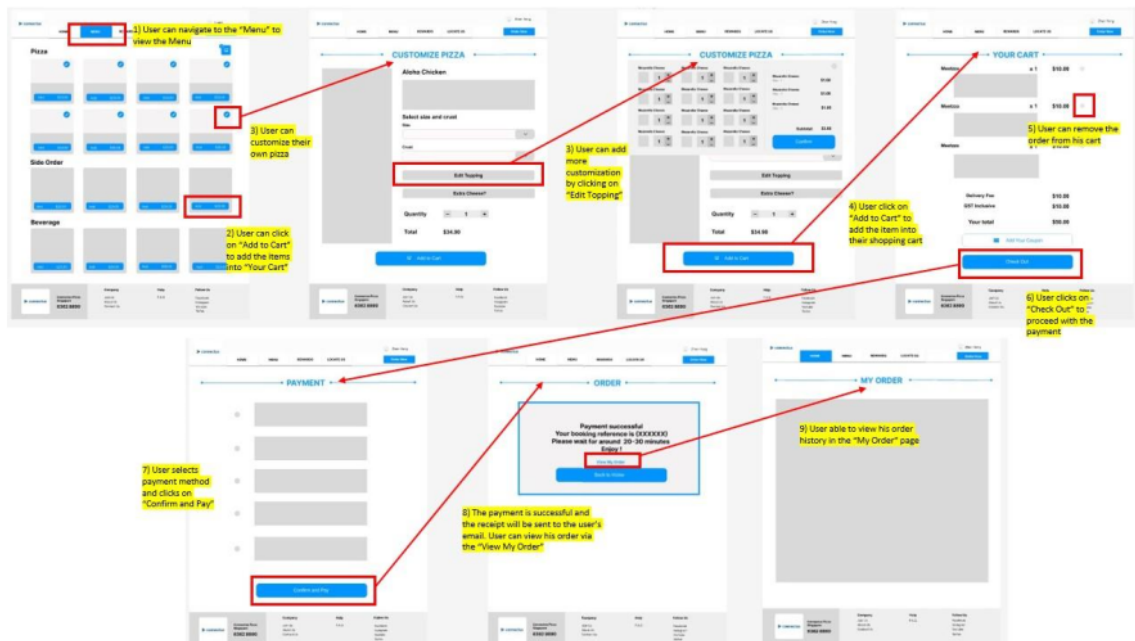

Anonymous User

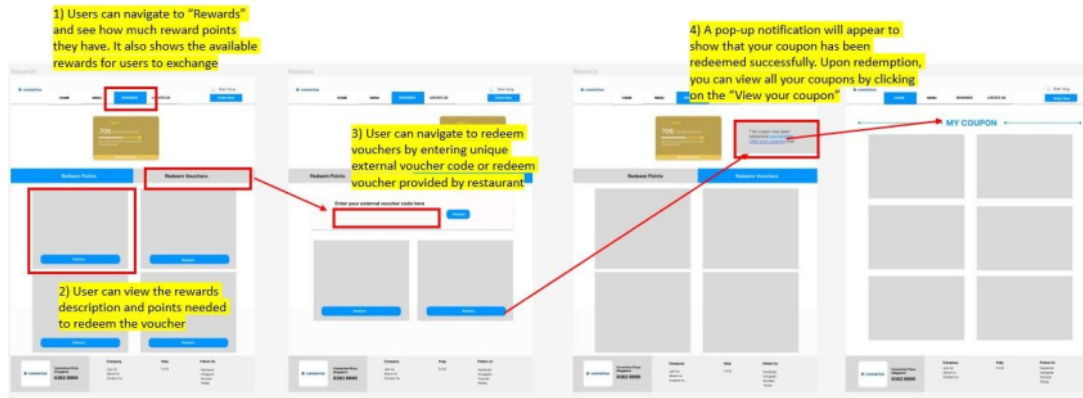

Logged-In User

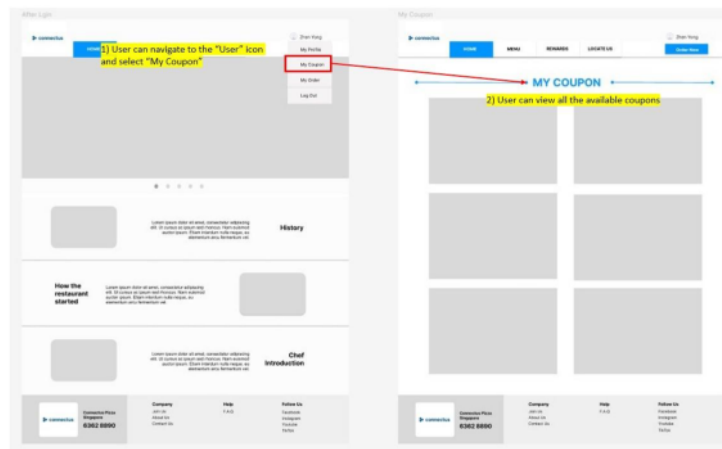

- User wish to add the item into the cart and checkout

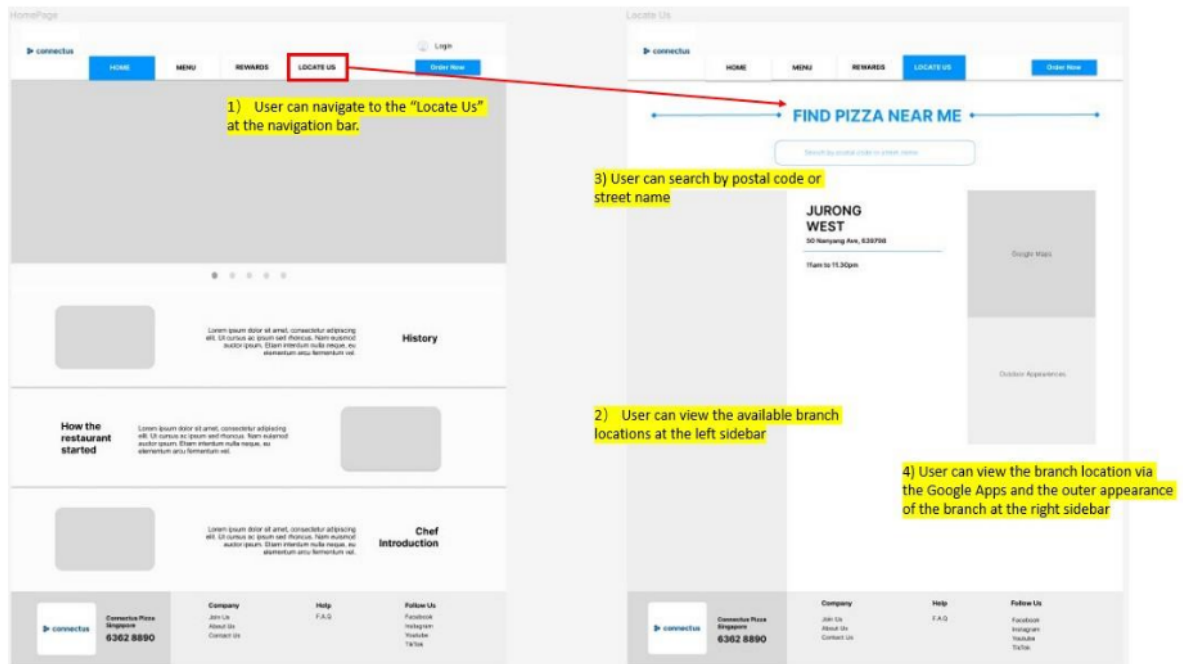

- Users wish to view their reward points, redeem vouchers and view their vouchers

Alternatively,

- Users wish to check for our restaurant's branch location, operating hours and outdoor appearance
